Subject: FW: Proteco: Wednesday Morning February 9, 2022-Cattle on Site caused Another Short Work Stoppage
Date: Wednesday, February 09, 2022 9:26:06 AM

Hello Zolymar,

As we just discussed on the phone, we had to stop work a second time this morning at 9:15 AM EDT (10:15 AM PR time) because the cattle entered and remained in the work area. We discussed that you contacted Mr. Serna this morning and he informed you that he would return to the Site by approximately 11:00 AM PR time to remove the cattle. I have informed our field personnel to expect Mr. Serna by that time.

Best Regards,

Subject: Proteco: Wednesday Morning February 9, 2022-Cattle on Site cause Short Work Stoppage

Hello Zolymar,

As we discussed on the phone, at 8:45 AM EDT (9:45 AM your time) this morning (2/9/2022) I received a call from Jaime Feliciano stating that the cattle were still present at the Site and that work had to stop for about 15 minutes for

the cattle to move away from the equipment and field personnel who were working near the old cattle pen area. Jaime also informed me that Mr. Serna stopped by the Site this morning to ask if the cattle were still on the Site and was informed that they were there. Jaime also informed me that Mr. Serna did not leave his vehicle this morning and left very shortly after learning his cattle were still on the Site. Please note that all the fences were inspected late yesterday afternoon and are intact.

Please contact Mr. Serna and instruct him to remove his cattle from the Site. Please let us know when Mr. Serna will return to the Site and we will inform the field personnel.

Best Regards,

Dan Gainer, PG CSM
